

# ATTENTION Drug Disposal Staff

## Rx DESTROYER™ Directions

1. Load medications into the bottle - Use funnel for easy loading
  - Load patches into bottle
  - Squirt syringe dose into bottle
  - DO NOT place syringe or vial into the bottle, use Sharps container
2. Tightly secure cap and gently shake for 10 seconds
3. Store in safe area and use again
4. After each drug disposal session, repeat step #2
5. Bottle is full when contents rises within 2" from top of bottle
6. Discard full bottle in common garbage
  - Do not pour contents in a sink or flush in toilets
  - Funnel can be used again - Do not discard

### OPTIONAL:

Prior to discarding bottle, Hardener Packet(s) may be added to convert liquid contents to a solid. Help to prevent accidental liquid spills in garbage can. Refer to instructions on Hardener Packet.

## Types of Non-Hazardous Medication

Pills, Liquids, Syringe Injectables, Fentanyl Patches, Suppositories, & Lozenges

- Medications begin dissolving on contact
- Activated carbon adsorbs/neutralizes
- Outer Capsule and fentanyl patch will not dissolve
- Meets EPA solid Non-Hazardous waste guidelines (refer to facility, local, state, tribal and federal disposal guidelines)
