

EMS controlled substance regulations have changed.

Is your workflow ready?

EMS agencies are now recognized as DEA registrants and are facing defined expectations around controlled substance handling, documentation, wasting, and disposal under PPAEMA. The challenge is making sure the process works across real crews, vehicles, shifts, and emergency response conditions.

Get DEA compliant with Rx Destroyer.

Rx Destroyer EMS Compliance Solutions help teams simplify drug disposal wasting with compliant, field-ready disposal solutions designed for the roughest roads, longest shifts, and highest-pressure environments.

DRUG DISPOSAL MADE EASY AS 1, 2, 3

Drug disposal made simple for EMS teams.

Rx Destroyer helps support the disposal step with field-ready solutions that reduce unnecessary handling and make drug wasting easier to standardize across crews, vehicles, and shifts.

Legacy workflows may not be enough. Hospital connected, legacy, or informal disposal processes may be harder to standardize and defend under current DEA/PPAEMA expectations.

Common disposal needs may include liquid medication waste from EMS controlled substance wasting workflows.

WORKFLOW GAPS MAY INCLUDE:

- Unclear wasting or disposal procedures
- Inconsistent witnessed waste documentation
- Extra handling before disposal
- Processes that work on paper but are difficult to follow in the field

A stronger EMS disposal process should support:

CHAIN OF CUSTODY PROTECTION

FIELD-READY DRUG DISPOSAL

WITNESSED WASTE DOCUMENTATION

AUDIT-READY CONSISTENCY

EMS Accountability: Before vs After

BEFORE RXD SOLUTIONS

- ✗ Hospital-supported or informal disposal processes
- ✗ Documentation varied by crew or shift
- ✗ Responsibility and review readiness could feel unclear

AFTER RXD SOLUTIONS

- ✓ Clearer internal disposal workflows
- ✓ Supports consistent documentation and chain of custody practices
- ✓ Field-ready disposal processes built for EMS

Let's get you audit ready.
