

Drug Disposal Starter Kits

Bundle and Save 25%

New to Rx Destroyer but don't know where to start? Our Starter Kits are designed to get your facility compliant with all of the tools necessary for safe and easy drug disposal at the lowest price possible. All Starter Kits include one bottle of Rx Destroyer, a Secure Mounting Bracket, and two different Funnels. Follow the steps below to find out which Kit will work best for your facility.

1

Choose Formula: All Purpose or Liquid

Our two drug denaturing products, All Purpose and Liquid, were formulated to achieve drug destruction efficacy for different types of medications. If you are wasting more than 70% solid medications, choose the All Purpose formula. If you are wasting more than 70% liquid medications, choose the Liquid formula.

2

Choose Bottle Size: 16 oz, 64 oz, or 1 gal

Our bottle sizes are designed for varying volumes of drug disposal. If you're unsure what size will be most appropriate for your needs, connect with one of our specialists through phone, email, or chat.

3

Choose Mount: Wire Mount or Lock Box

Our custom designed mounting accessories are designed for secure mounting and permanent placement. Our Lock Boxes come with a lock and key and can be affixed to both wall and counter surfaces. The Wire Mount has an adjointed lockable cable and can be easily attached to med carts or mounted to walls.
