Drug Disposal Made Simple

Rx Destroyer is a fast acting ready to use formula that begins neutralizing medications on contact, complying with the DEA non-retrievable standard 21 CFR and the EPA's 40 CFR. Meeting these standards can be challenging for healthcare and non-medical facilities without product and process intervention. Integrating Rx Destroyer drug disposal systems into your existing pharmaceutical program is easy, cost effective, and simply the most comprehensive solution in preventing drug abuse, drug diversion, and stockpiling. Our bottles are ergonomic and space-optimizing, and our vented caps regulate bottle pressure to allow the commingling of medications that produce off-gassing.

Our two formulas, All-Purpose and Liquid, each play a critical role in the safeguarding of pharmaceuticals simply and efficiently. **For questions on which formula or size is right for you, contact our team of specialists.**

All-Purpose Formula

Our All-Purpose product range is formulated to work with both liquid and solid medication disposal. This formula is recommended for those who are disposing of 70% or more of solid medications and/or less than 30% of liquid medications. Medications are deemed non-retrievable once adsorbed by activated carbon. To use, simply add medications, agitate, and dispose when bottle contents are 2" from top.

Which Rx Destroyer product range is right for you?

ALL PURPOSE VS LIQUID

Our two drug denaturing products, All-Purpose and Liquid, were formulated to achieve drug destruction efficacy for different types of medications. Ultimately, the correct product for your drug disposal needs is determined by what medications you are wasting.

If you find that you are wasting more than 70% solid medications (pills, lozenges, etc.) and less than 30% liquid medications (injectables, elixirs, etc.) then you would want to choose from our **All-Purpose line**.

If you find that you are wasting more than 70 % liquid medication (injectables, elixirs, ect.) and less than 30% solid medications (pills, lozenges, etc.) then you will want to choose from our **Liquid line**.

PRO SERIES VS STANDARD

The Pro Series was designed to enhance the safety and ease of use of Rx Destroyer products. Three features make up our Pro Series: a side viewing gauge, a custom tethered cap, and a more ergonomic shape for storage and accessibility. A clear view gauge provides instant fill visibility, eliminating the guesswork of evaluating maximum capacity from the lid opening. Negating the risk of lost or misplaced caps, our smart tethered cap design is secured to the bottle, ensuring that the product can be safely secured.

For environments where there are multiple users dispensing of drugs, we recommend the Pro Series to drive greater fill utilization and to ensure the secure capping of the product when full. If any or all these features apply to your needs, then you will want to choose from our **Pro Series line**.

WHAT DOES PRO MEAN?

Designed specifically for our professional users, the Rx Destroyer Pro Series comes with the same carbon based formula that RX Destroyer products have become renowned for, however additional features have been added to provide heightened security and efficiency in the products' use. **Each product within our Pro Series comes with a tethered cap which eliminates risk of caps being misplaced when in use, and a viewing gauge which allows instant visual recognition of contents fill level.**

Hardener Packets

Rx Destroyer Hardener Packets help prevent potential messy liquid spills in the waste stream. Dust free formulation converts Rx Destroyer into solid gel in minutes, thereby meeting the SW-846 paint filter standards which are mandatory standards for liquid waste to be accepted by landfills. Once your Rx Destroyer bottle is full, simply add the hardener pouch(es) to the bottle and dispose. Each Rx Destroyer Liquid Line product comes with Hardener packets included.
