

# Community Drug Disposal that Saves Lives

Medical grade drug  
deactivation solutions  
for at-home use

SAVING WATER. SAVING LIVES. ONE PRESCRIPTION AT A TIME.

# Why We Exist

Our brand story and the impetus that has shaped the last decade of our focus, began with a unique life-changing encounter. Our founder, Milt Dallas, was a panelist on a Milwaukee Time Warner cable show in 2010 when he first met Sherry Day – a nurse whose professional career had been significantly impacted by a fatal drug overdose that resulted from a teenager fishing through the contents of a nursing home dumpster. Sherry's passion and extensive nursing expertise combined with Milt's creative vision and skill as an entrepreneur and innovator would lead to a dynamic partnership that would re-imagine the world of secure drug disposal.

Over the next 12 years, Milt would champion drug-diversion advocacy not only through the development of drug deactivation product solutions with Sherry Day but consequently with national lobbying for greater community protections and legislation around opioid abuse, community and state-level drug education advocacy, and the furthering of product innovation with Rx Destroyer. With the new federal law 21 CFR enacted in 2014 regulating the disposal of drugs and controlled substances, heightened EPA focus on the human risk of pharmaceutical pollution, and a concerning upward trend nationally of opioid abuse within professional and domestic environments, Milt and the team at Rx Destroyer have continued to innovate solutions and drive advocacy for safe drug disposal. Rx Destroyer will continue to support your efforts in the reduction of substance abuse wherever you need us. We are here to provide you a support system and a solution.

# Communities We Protect

Underserved or Low  
Socioeconomic  
Communities

Rural, Tribal, POC &  
Diverse Communities

Government &  
Public Health

Rehabilitation  
Centers & Behavioral  
Health Programs

**Rx Destroyer was born out of a passion for protecting local communities from the repercussions of irresponsible drug disposal. Our goal is to:**

- Eliminate drug stockpiling and its influence on substance abuse
- Prevent the life threatening consequences of unauthorized drug diversion
- Provide a substance abuse prevention strategy to protect your community, its youth, its children, its most vulnerable
- Protect the health of our natural environment with a “No Flush” alternative to medication disposal

**Rx Destroyer is a fast acting ready-to-use chemical digestion formula that begins neutralizing medications on contact, complying with the DEA Non-Retrieveable Standard 21 CFR and the EPA's 40 CFR**

## Expert Support We Provide

Non-retrievable drug deactivation actively protects people, communities and the environment by eliminating the risk of wrongful misuse or incorrect disposal. At Rx Destroyer, we are committed to not only delivering products that eliminate risk of drug diversion, but partnering with passionate non profit, government and private organizations to design drug abuse prevention strategies that affect change at a community level. Partnership tools we provide include:

- **Local Pharmacist** who can support our partners or users with real-time expert drug disposal guidance
- Customized, multi-lingual **education materials** and co-branded training and social media tools to drive local adoption and trust
- **Bespoke Partnership** labelling and distribution plans facilitated at a federal, state or community level
- **Multi-Choice disposal and treatment options** available through national and local licensed waste partners for those in need of a professional waste service
- **Surveys** facilitated to assess program adoption and gather timely feedback
- A **specialist support team** who can help you navigate state and local-level regulations, and leverage national partnerships to execute effective drug disposal and opioid abuse mitigation strategies.

# Community-Impacting Drug Destruction Solutions

Rx Destroyer drug disposal systems are easy, cost effective, and simply the most comprehensive solution in preventing drug abuse, drug diversion, and stockpiling. Our solution is non toxic and space-optimizing for home use, our caps are child resistant providing security in your home to those who may be vulnerable, and to top it off reusable!

## HOME-USE SOLUTIONS

- 4oz bottle designed to fit inside a home medicine cabinet
- Reusable, can be used multiple times for up to 1 year once opened
- Child proof cap and ready-to-use formula, no adding water.

## MASS-COLLECTION SOLUTIONS

- 5 gallon bottle for bulk drug collection, larger sizes available.
- Reusable, can be used across multiple collection days for up to 1 year once opened
- Attachable funnel that facilitates bulk disposal

If you are in need of a waste hauler, we have national relationships with waste disposal companies who can facilitate the secure disposal and destruction of mass-collected medications and Rx Destroyer products in accordance with DEA and RCRA requirements, and in a way that ultimately protects environmental impact.

# How we help destroy drugs

There is no single universal approach to safe medication disposal at a community level, which is why industry partnerships are so critical to combatting the opioid crisis in America.

## MEDICATION COLLECTION STRATEGIES

Medicine-Cabinet size Rx Destroyer bottles can be provided to households for ongoing 'at-home' drug destruction.

Disseminate Rx Destroyer solutions via mail, facilitating at home disposal for those without transportation or rurally located.

Host a community "Drug Collection" event in partnership with DEA-exempt public services such as your local law enforcement agency, collecting drugs in a large capacity Rx Destroyer system.

Host your own drug collection event without a DEA exempt partner.

## MEDICATION DISPOSAL BEST PRACTICE

Once sealed, Rx Destroyer bottles containing the deactivated drugs can be disposed of in general trash.

Filled Rx Destroyer bottles can be directly mailed to one of our partner pharmaceutical treatment facilities.

These DEA exempt entities such as local law enforcement, can host and then dispose of Rx Destroyer once drugs are deactivated in the common trash.

Register with the DEA to become a DEA registrant. You must also apply to be a registered collector.

**BE CREATIVE!** What works best in your community and how can we support? We would love to brainstorm together.

\*As a DEA Registrant, with regard to pharmaceutical waste disposal and other regulated activities associated with pharmaceuticals, always follow applicable federal, state, local, tribal laws/regulations. This does not apply to ultimate users.

## EXPLORE A PARTNERSHIP
